Ref. Air Purifier units.

We have been introduced to units meant to purifier the air. We tested one Blaster in the kitchen, plus one Eagle5000 out in restaurant.
There is no doubt in, that the air quality is remarkably better, after installing these devices.

We are so satisfied, that we like to recommend restaurants in the same business, to use those air purifiers.

We have used these machines now for 6 months.

We can strongly recommend these units!

Yours sincerely
