

Metbar

Coffee & restaurant

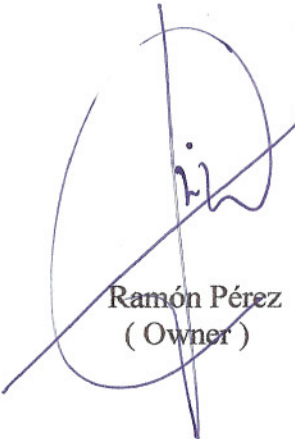

Madrid, January 28th 2008

To whom it may concern:

In Metbar, we have been using Activ-Tek Technology to purify our indoor air, for sometime now. We purchased 3 Eagle 5000 units from the company T3amworx Space, which we have operating 24 hours a day to maintain a clean environment, free of odors and smoke.

These machines have completely neutralized all odors in our dinning area. Our clients continuously make positive remarks about the sense of freshness they enjoy inside our restaurant. Thanks to this wonderful technology, all smoke and cigarette smell has been eliminated in our smoking area.

Given these great results, and our most sincere confidence in the product, we strongly recommend its use in the restaurant business.

Ramón Pérez
