

ZINC
belleza integral

Madrid, October 31st 2007

Zinc Beauty Salon acquired and installed a Fresh Air purifier from the company T3amworx Space to create a natural and healthy environment inside our establishment. We have noticed an important improvement in the quality of air, and the elimination of strong odors produced by the different hair products we use.

The most significant change has been the many positive comments made by our clientele, on how well they feel and breathe inside our business.

We have been named by Vogue Magazine, one of the twenty best beauty salons in the Madrid area. The way we treat our clients, and the satisfaction with which they leave, is of utmost importance to us; therefore, we saw it necessary to include along with our state of the art treatments, this air purifier by Ecoquest International. Thanks to its advanced technology, our indoor air quality has improved, and resembles that of natural mountain air.

We are very pleased with the results obtained, and strongly recommend the use of this technology to purify air indoors.
